Skills

- Python Programming
- C++ Programming

Courses

100K AgentBlazer Champions, *SmartBridge*
Online
Gained knowledge of Salesforce Agentforce, AI powered agents, generative AI, and automation. Learned how AI agents support business processes and improve customer experiences through Salesforce technologies.

Generative Artificial Intelligence, *SmartBridge*
Online
Completed training in Generative Artificial Intelligence (Gen AI). Gained knowledge of Generative AI concepts, Large Language Models (LLMs), Prompt Engineering, AI tools, and real world applications. Developed an understanding of how Generative AI can be used to create content, solve problems, and improve productivity.

Languages

- Telugu
- Tamil
- English

Projects

LegalEase – AI-Based Legal Document Generator
Developed an AI based application called LegalEase to generate legal documents based on user requirements. The project uses Generative AI and Gemini API to create customized legal documents. Streamlit is used for the frontend, and FastAPI handles backend operations. This project helps simplify the document creation process and improves accessibility.
